

## Digital Extreme Temperature Sensor

Monitor extreme temperature ranges in locations such as cold storage, labs, manufacturing & more.

RMA-DET-SEN

### We've got facilities covered.

The Digital Extreme Temperature Sensor is custom designed to monitor temperatures in extreme environments such as cold storage, laboratories, manufacturing and more. The steel sensor tip can be installed directly into the location or equipment that needs to be monitored and provides temperature values from -328° to 932° Fahrenheit.
